

Beamer Example on Parts

Till Tantau

Fakultt fr Elektrotechnik und Informatik
Technical University of Berlin

9th November 2003

Outline of Part I

Summary of the Previous Lecture

Topics

Learning Objectives

Outline of Part II

The Model of Overhead-Free Computation
The Standard Model of Linear Space

Limitations of Overhead-Free Computation
Linear Space versus Overhead-Free Computation

Outline of Part II

The Model of Overhead-Free Computation

The Standard Model of Linear Space

Limitations of Overhead-Free Computation

Linear Space versus Overhead-Free Computation

Part I

Review of Previous Lecture

This frame shows the topics treated in the last lecture.

- This
- and that.

This frame shows the topics treated in the last lecture.

- This
- and that.

This frame shows the last lecture's learning objectives.

- An objective.
- And another one.

This frame shows the last lecture's learning objectives.

- An objective.
- And another one.

Part II

Today's Lecture

The Model of Overhead-Free Computation

The Standard Model of Linear Space

Limitations of Overhead-Free Computation

Linear Space versus Overhead-Free Computation

A frame.

The Model of Overhead-Free Computation

The Standard Model of Linear Space

Limitations of Overhead-Free Computation
